Acrylic Embroidery Thread with a Woollen Feel

## High-Quality Embroideries – Like Handstitched!

Whether precious embroideries on woollens or knits, vintage-style patterns for traditional costumes, or colourful ethnic clothes: FILAINE is the expert for rustic embroideries with that typical needlework look. Despite its fine woollen structure FILAINE is extremely robust during processing and particularly convincing through high tear and rub resistance.

## Processing Recommendations:

- ◆ **Needle:** Use ORGAN No. 90.
- ◆ **Bobbin Thread:**  
For best results, use BOBBY SYN 100,  
BOBBY FIL 120 L.
- ◆ **Designs:**  
Only for embroidery programmes designed  
for such strong yarns.  
**Important:** Widely laid-out, a minimum of  
short stitches, preferably with only few or  
no underlay stitches.

- ◆ **Tip!**  
For embroideries on coarse fabrics, SOLVY  
will prevent stitches from disappearing in  
the fabric, thus enhancing the special  
needlework touch.
